

Lekkala Ganesh

AI Application Engineer | Full-Stack Web Developer

Bangalore, India | +91-8688479455 | lekkalaganesh14@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Full-stack and AI application engineer shipping **end-to-end web applications** in **TypeScript** and **Python**: React clients, **Node.js/Express** and **FastAPI** services, **PostgreSQL/MongoDB** schema design — and the machine learning inside them: **embedding-based retrieval (RAG)**, **scikit-learn** text matching, **ONNX** model serving, and **multi-provider LLM orchestration** with fallback. **320+** **automated tests** and **CI** across public repos. B.Tech CSE.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL, HTML5, CSS3

Machine Learning: scikit-learn, Pandas, NumPy, Regression, Classification, Feature Engineering, Cross-Validation, Hyperparameter Tuning, Model Evaluation, EDA, TF-IDF, Cosine Similarity

AI & Deep Learning: PyTorch, Hugging Face (Diffusers, Transformers), sentence-transformers, ONNX Runtime, OpenCV DNN, 4-bit NF4 Quantization (bitsandbytes), CUDA

Generative AI & RAG: GPT-4o, Gemini, Ollama (local inference), Embeddings, Vector Search (Milvus, Pinecone), Semantic Search, Prompt Engineering, Multi-Provider Fallback, SSE Streaming

Backend & Data: MERN Stack (MongoDB, Express.js, React, Node.js), FastAPI, Flask, REST APIs, WebSockets, Async Job Queues, Pydantic, PostgreSQL (Row-Level Security, Triggers, Indexes), SQLite, Supabase, Schema Design, Joins & Aggregations, Parameterized Queries

Frontend, Testing & DevOps: React, Next.js (SSR/SSG), Tailwind CSS, Responsive Design, pytest, Vitest, Playwright, GitHub Actions (CI), Docker, Git, Linux, Vercel (deployment)

EXPERIENCE

Freelance Full-Stack & AI Engineer

Self-Employed

Remote

Jan 2025 – Present

- **AI Training Data & Annotation:** Author scoring **rubrics** and **hand-label model outputs**, **blind-scored** against anchored criteria before automated judging; **adversarial probes** for sycophancy, verbosity, position bias.
- **LLM Integration:** Engineered **multi-provider AI fallback** (GPT-4o → Gemini → OpenRouter) with graceful degradation, powering real-time **SSE** voice streaming (**VoxAI**) and 3D sunlight simulation.
- **Data Modeling:** Designed **PostgreSQL** schemas — foreign keys, CHECK constraints, composite indexes, triggers — securing per-user data with **Row-Level Security** policies and **JWT** auth on Supabase.
- **End-to-End Full-Stack Delivery:** Shipped client web apps **end-to-end** — **REST API** design and React/Next.js front-ends **deployed on Vercel**, meeting **WCAG 2.1 AA** with **Playwright** cross-browser testing.

Full Stack Web Development Intern

Slash Mark IT Solutions

Remote, Part-time

Dec 2024 – Apr 2025

- Delivered **6 full-stack projects** on the **MERN stack** (MongoDB, Express.js, React, Node): Weather Forecast, URL Shortener **REST API**, and a Food Delivery app with **authentication**, geolocation, and payment flow.

Machine Learning Intern

Bharat Intern

Virtual

Oct 2023 – Nov 2023

- Built **regression** and **classification** models (House Price, Wine Quality, Iris) in **Python** with **scikit-learn** and **Pandas** — **data cleaning**, **EDA**, and **feature engineering**; compared estimators via **train/test splits**, **cross-validation**, and **hyperparameter tuning** on held-out **evaluation** metrics.

PROJECTS

ATS Resume Optimizer | *Python, scikit-learn, Streamlit, SQLite, GitHub Actions*

[GitHub](#)

- Resume-to-job **semantic matching** via **scikit-learn TF-IDF** and **cosine similarity** with keyword-gap extraction; **269** **pytest tests** and **GitHub Actions CI** (3.11/3.12, ruff) over **~20K lines of Python**.

Healthy Chef — MERN Invoicing Platform | *MongoDB, Express, React, Node.js, TypeScript*

[GitHub](#)

- **React/Redux Toolkit** invoice builder with live GST math over an **Express/Mongoose** API that recomputes every total server-side in **integer pause**; **Zod** validation at env and request layers, rate limiting, **40 tests**.

Lite-Vision — Real-Time Face Analysis | *FastAPI, OpenCV DNN, ONNX, Next.js*

[GitHub](#)

- Serves **four pretrained ONNX models** (SCRFD, InsightFace gender-age, FairFace, FER+) via an **OpenCV DNN** pipeline with **multi-model fusion** and frame caching; rate-limited **FastAPI**, live webcam streaming, **73 tests**.

LLM-as-Judge Evaluation Pipeline | *Python, Rubric Design, Human Annotation, pytest*

[GitHub](#)

- **Hand-labeled 105 human judgments** (15 outputs, 6 criteria + holistic) against a self-authored **rubric** with 1/3/5 anchors, scored before any judge ran; **60 eval items** incl. **27 adversarial probes** in 5 categories.

EDUCATION

Parul University

Bachelor of Technology in Computer Science & Engineering; GPA: 7.53/10

Vadodara, Gujarat

Jul 2022 – Jun 2025
